

LISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims:

1. (Cancelled)
2. (Currently Amended) A method of treating a subterranean formation comprising the steps of:

providing a servicing fluid comprising carbon dioxide and a hydrocarbon blend,
wherein the hydrocarbon blend comprises at least about 65% hydrocarbons having from seven
carbons (C₇) to ten carbons (C₁₀); and

placing the servicing fluid into the subterranean formation. The method of claim 1
wherein the hydrocarbon blend comprises at least about 65% hydrocarbons having from seven
earbons (C₇) to ten carbons (C₁₀).

3. (Currently Amended) The method of claim + 2 wherein about 85% of the
hydrocarbon blend comprises hydrocarbons having eight carbons (C₈), hydrocarbons having
nine carbons (C₉), or a mixture of hydrocarbons having eight carbons (C₈) and hydrocarbons
having nine carbons (C₉).

4. (Currently Amended) The method of claim + 2 wherein the hydrocarbon blend
has a Reid Vapor pressure below about 2 psi.

5. (Currently Amended) The method of claim + 2 wherein the hydrocarbon blend
comprises less than about 1% hydrocarbons having more than ten carbons (C₁₀).

6. (Currently Amended) The method of claim + 2 wherein the hydrocarbon blend
comprises less than about 1% hydrocarbons having fewer than seven carbons (C₇).

7. (Currently Amended) The method of claim + 2 wherein the servicing fluid further
comprises a gelling agent present in an amount in the range of from about 0.1% to about 2.5% by
weight of the hydrocarbon blend.

8. (Previously Presented) The method of claim 7 wherein the gelling agent is
selected from the group consisting of ferric iron polyvalent metal complexes of alkylphosphonic
acid esters, aluminum polyvalent metal complexes of alkylphosphonic acid esters, and
combinations thereof.

9. (Previously Presented) The method of claim 7 wherein the gelling agent is selected from the group consisting of ferric iron polyvalent metal complexes of orthophosphoric acid esters, aluminum polyvalent metal complexes of orthophosphoric acid esters, and combinations thereof.

10. (Previously Presented) The method of claim 7 wherein the gelling agent is selected from the group consisting of ferric iron polyvalent metal complexes of unsymmetrical dialkylphosphinic acids, aluminum polyvalent metal complexes of unsymmetrical dialkylphosphinic acids, and combinations thereof.

11. (Currently Amended) The method of claim +2 wherein the servicing fluid further comprises a LPG fluid.

12. (Currently Amended) The method of claim +2 wherein the servicing fluid further comprises particulates.

13. (Currently Amended) The method of claim +2 wherein the servicing fluid further comprises a delayed gel breaker.

14. (Currently Amended) The method of claim +2 wherein the hydrocarbon blend comprises less than about 1% hydrocarbons having fewer than seven carbons (C₇), about 5% hydrocarbons having seven carbons (C₇); about 44% hydrocarbons having eight carbons (C₈); about 43% hydrocarbons having nine carbons (C₉); about 8% hydrocarbons having ten carbons (C₁₀); and less than about 1% hydrocarbons having more than ten carbons (C₁₀).

15. (Original) The method of claim 14 wherein the hydrocarbon blend comprises substantially no hydrocarbons having more than eleven carbons (C₁₁).

16. (Currently Amended) The method of claim +2 wherein the servicing fluid comprises from about 30 volume % to about 80 volume % carbon dioxide by volume of hydrocarbon blend.

17. (Cancelled)

18. (Currently Amended) A method of fracturing a subterranean formation comprising the step of placing a fracturing fluid comprising carbon dioxide and a hydrocarbon blend into the subterranean formation at a pressure sufficient to create at least one fracture therein wherein the hydrocarbon blend comprises at least about 65% hydrocarbons having from seven carbons (C₇) to ten carbons (C₁₀). The method of claim 17 wherein the hydrocarbon blend

comprises at least about 65% hydrocarbons having from seven carbons (C₇) to ten carbons (C₁₀).

19. (Currently Amended) The method of claim 18 +7 wherein about 85% of the hydrocarbon blend comprises hydrocarbons having eight carbons (C₈), hydrocarbons having nine carbons (C₉), or a mixture of hydrocarbons having eight carbons (C₈) and hydrocarbons having nine carbons (C₉).

20. (Currently Amended) The method of claim 18 +7 wherein the hydrocarbon blend has a Reid Vapor pressure below about 2 psi.

21. (Currently Amended) The method of claim 18 +7 wherein the hydrocarbon blend comprises less than about 1% hydrocarbons having more than 10 carbons (C₁₀).

22. (Currently Amended) The method of claim 18 +7 wherein the hydrocarbon blend comprises less than about 1% hydrocarbons having fewer than seven carbons (C₇).

23. (Currently Amended) The method of claim 18 +7 wherein the fracturing fluid further comprises a gelling agent present in an amount in the range of from about 0.1% to about 2.5% by weight of the hydrocarbon blend.

24. (Previously Presented) The method of claim 23 wherein the gelling agent is selected from the group consisting of ferric iron polyvalent metal complexes of alkylphosphonic acid esters, aluminum polyvalent metal complexes of alkylphosphonic acid esters, and combinations thereof.

25. (Previously Presented) The method of claim 23 wherein the gelling agent is selected from the group consisting of ferric iron polyvalent metal complexes of orthophosphoric acid esters, aluminum polyvalent metal complexes of orthophosphoric acid esters, and combinations thereof.

26. (Previously Presented) The method of claim 23 wherein the gelling agent is selected from the group consisting of ferric iron polyvalent metal complexes of unsymmetrical dialkylphosphinic acids, aluminum polyvalent metal complexes of unsymmetrical dialkylphosphinic acids, and combinations thereof.

27. (Currently Amended) The method of claim 18 +7 wherein the fracturing fluid further comprises a LPG fluid.

28. (Currently Amended) The method of claim 18 ~~17~~ wherein the fracturing fluid further comprises particulates.

29. (Currently Amended) The method of claim 18 ~~17~~ wherein the fracturing fluid further comprises a delayed gel breaker.

30. (Currently Amended) The method of claim 18 ~~17~~ wherein the hydrocarbon blend comprises less than about 1% hydrocarbons having fewer than seven carbons (C₇), about 5% hydrocarbons having seven carbons (C₇); about 44% hydrocarbons having eight carbons (C₈); about 43% hydrocarbons having nine carbons (C₉); about 8% hydrocarbons having ten carbons (C₁₀); and less than about 1% hydrocarbons having more than ten carbons (C₁₀).

31. (Original) The method of claim 30 wherein the hydrocarbon blend comprises substantially no hydrocarbons having more than eleven carbons (C₁₁).

32. (Currently Amended) The method of claim 18 ~~17~~ wherein the servicing fluid comprises from about 30 volume % to about 80 volume % carbon dioxide.

33. - 79. (Cancelled)
